

# Partner Evaluation License Key Document - Version 1

## Evaluation License Keys - Expire on October 19th, 2018

**Note that the license release and expiration dates have been changed to align with VMware's new quarterly accounting schedule.**

**The information contained in this document is confidential and intended for use solely by VMware-authorized partners in connection with evaluation licenses that have been provided to them. Any unauthorized use, disclosure or distribution of this information is prohibited.**

Your Key to VMware Products: Partner License Evaluations Source Guide

This document contains the evaluation license keys for VMware products. The keys are updated approximately every 90 days and are available from the vmware.com Partner Central site.

Note that this document will be updated with major new license types for products released between normal license distribution cycles.

Please download the products using a MyVMware account that is assigned your NFR product licenses.

You will only be able to use licenses from this list that you are allowed to download through your NFR entitlements. If you do not have NFR entitlements for a given product, you will be unable to download the product.

The next license series will be released on or before October 8th, 2018 to replace these licenses to ensure that you do not suffer a lapse in functionality in the middle of an engagement.

Please be certain that you understand how to correctly apply the licenses BEFORE providing them to a customer.

Be aware that, under some circumstances, a cut-paste of license keys from a pdf may not work correctly.

I have had reports of key rejections when they were transferred using a cut/paste from this distribution pdf, but worked correctly when it is entered manually.

I suspect that it can happen for a variety of reasons, but suffice to say, if a license key from my distribution is rejected when you enter the license using a cut/paste, please enter the license key manually.
